Please reject the National Association of Broadcaster's petition 04-160 that would prohibit satellite radio, specifically XM radio, to broadcast local (Instant Traffic & Weather). I pay for and choose to listen to satellite radio because it offers me a service that meets my needs and not those of the broadcasters. Finally, I'm able to choose the music and information that I truly enjoy and support. I listen to FM radio in my home only in the morning before leaving for work. My car has satellite radio and I happily change from jazz to oldies to news programming that reflects my lifestyle, not that of a conglomerate that cares little about offering pertinent music or meeting the needs of the listenership. The NAB has never been responsive to the listenership only propagating it's own interests. Thank You,  
Sharon K. DiRienzo
